

RESIDENTIAL & LIGHT COMMERCIAL AIR CONDITIONING CATALOGUE

Your *natural* conditions

Since 1916  **Inventor**, pioneers in the US market, by designing and manufacturing innovative air conditioning and heat pump units. The company's primary competitive advantage is the use of its know-how expertise gained in the past, to build air conditioning systems of the future.

The key to  **Inventor** units' success is that they are specifically designed to enable the modern individual invent his own custom made living and working conditions.

Regulating effectively the natural environment, inventor units can create silently the perfect indoor conditions; your conditions!

The manufacturing technology used in the production of the inventor air conditioning units ensures their reliable operation according to the highest energy class standards, achieving, maximum performance with minimum consumption rates and environment friendly operation.

Their excellent quality, operational efficiency and the use of eco-friendly refrigerants have been awarded with European Union certificates of the highest standard.

for the compressor
and for all parts
of the unit

Listed by applied research laboratories

ISO 14001

NEW TECHNOLOGIES

ENERGY CLASS A

According to the European Union, all electrical appliances are classified from class A to class G in respect of their performance and energy consumption. Consequently seven energy classes are created (from A to G) where A is the most efficient while G is the less one. By choosing an Energy Class A unit you succeed the highest performance with the least energy consumption.

ADVANCED DC INVERTER TECHNOLOGY

By choosing a DC Inverter air conditioning unit you succeed low energy consumption up to 44% compared to conventional technology. In addition, a DC Inverter air conditioning unit approaches and maintains the desired temperature faster, while the operation of the unit is extremely quiet.

AUTO CLEAN FUNCTION

Auto Clean Function does not allow mold and bad smells to grow in the indoor unit, while operating in cooling mode. When we turn off the unit, the indoor fan continues its operation in low speed. In this way it dries the inner parts of the unit and it does not allow any pollution area to be created. This function is activated from the controller.

BIOLOGICAL ANTIBACTERIAL FILTER

The Biological Antibacterial Filter has the ability to disinfect the air from bacteria by 95% and at the same time to collect small particles like dust and pollen from the environment. When air passing the filter, dust and bacteria are adhered on the surface of filter, where there is bio-bactericide. The Biological Antibacterial Filter stops drastically the reproduction and growth of bacteria and as a result, it completely eliminates them. It is safe and environmental friendly.

ENVIRONMENTAL FRIENDLY REFRIGERANTS

Inventor units use environmental friendly refrigerants (Freon) R410A and R407C, thus they do not contribute to the increase of the global warming phenomenon and at the same time they protect the environment.

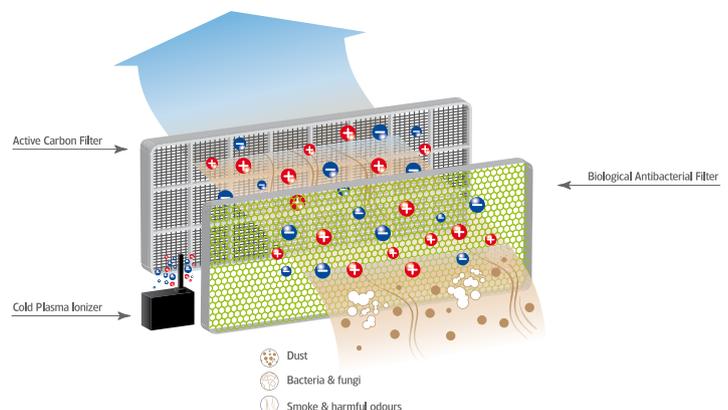

ACTIVE CARBON FILTER

Active carbon is an extremely absorbent element which has dual function, physical and chemical absorption. Due to its technological evolution, active carbon is able to absorb fast, harmful gases from the environment such as petrol, formaldehyde and ammonia. Active Carbon Filter offers a clean, odourless and healthy environment.

COLD PLASMA IONIZER

COLD PLASMA technology is currently one of the most advanced air-cleaning technologies in the world.

COLD PLASMA Ionizer releases positive and negative ions in the air, thus it disinfects and diminishes bad smells in the room. Furthermore it gathers house dust, pollen and other small particles that are responsible for allergies. At the same time it generates negative ions, in order to create a safe, healthy and relaxing environment.

TURBO FUNCTION

Turbo Function achieves the desired temperature at minimum time with low energy consumption.

INTELLIGENT DEFROST

Power saving and improved heating efficiency by intelligent defrost. INTELLIGENT DEFROST is achieved only by sensors that they control the need and duration of DEFROST PROCESS.

UMATCH TECHNOLOGY

Universal outdoor units ULS/ULT and URS/URT for all residential and ducted units contribute to have a common way to solve technical problems. In addition, the parts are identical and there is no need to have different part for each outdoor.

- Energy class A/A (APS-09, APS-12, AP-09, AP-12)
- Energy class A/B (APS-18, APS-24, AP-18)
- Ultra quiet operation
- Biological Antibacterial Filter – eliminates the number of bacteria by 95%
- Cold Plasma Ionizer – disinfects, sterilizes and deodorizes the air
- Active Carbon Filter – protects from harmful odors
- Auto Clean Function in cooling mode-protects the inner parts of the unit from mold and odors
- Turbo function – the desired temperature is reached at minimum time
- Low power consumption and higher efficiency due to New Defrost function
- Hot Start operation: the indoor coil sensor controls the indoor fan and prevents cold air during start up in heating mode
- LCD display and wireless remote control
- Activation and deactivation of the display on demand
- Auto swing louver
- 24-hour programming
- Ideal indoor environment with auto mode function
- Auto restart

RFI/RFO-30,50,66

- LCD display and wireless remote control
- Sanyo Scroll compressor
- Plug-in electric heater
- Auto error diagnosis
- Auto restart
- Vertical auto swing louver
- High/low pressure switch, phase protector and overload protection
- Sensors for high and low pressure protection
- Low power consumption
- High air flow

V1RFI/V1RFO-30,50

- Energy class A/A
- Advanced DC Inverter technology for high efficiency in extreme outdoor conditions
- Ultra quiet operation
- Auto error diagnosis
- Humidity indication
- LCD display and wireless remote control
- Activation and deactivation of the display on demand
- keypad lock on user's demand
- Turbo function – the desired temperature is reached at minimum time
- Auto Clean Function in cooling mode-protects the inner parts of the unit from mold and odors
- Hot Start operation: the indoor coil sensor controls the indoor fan and prevents cold air during start up in heating mode
- Auto restart
- Vertical and horizontal auto swing louver
- 24-hour programming
- Ideal indoor environment with auto mode function
- Steady operation in extreme outdoor conditions without efficiency loss
- Low power consumption
- High air flow
- Available in red and silver mirror panel

(*) stranded wire

(**) 15m wire length

- Low height; from 23 to 32cm
- Overflow pump indicator
- Auto swing louver
- 4-way airflow
- 24-hour programming
- Auto restart
- Easy removable and washable panel
- Quiet operation
- LCD wired and wireless remote control
- Auto error diagnosis
- Indoor room sensor at the air intake of the indoor unit and inside the controller (user can select one of the two indoor sensors)
- Centralized control; up to 16 modules (optional)
- Wired controller with weekly timer (optional)
- Outdoor temperature indication
- After power failure the unit restarts in the conditions that the user has selected

ICI/ULS,ULT

- High/low pressure switch, phase protector and overload protection
- Sensors for high and low pressure protection
- Hitachi rotary compressor (ULS-18, ULS-24)
- Sanyo scroll compressor (ULS-36, ULT-36)
- Daikin scroll compressor (ULT-50)
- Ideal indoor environment with auto mode function

VCI/URS,URT

- Energy class A/A (VCI-26+URS-24, VCI-45+URS-45)
- VCI-50+URT-50, soon with energy class A/A
- Advanced DC Inverter technology for high efficiency in extreme outdoor conditions
- Mitsubishi DC Inverter Scroll compressor
- Advanced DC Inverter technology: automatic control of cooling or heating according to indoor temperature resulting in maximum performance with minimum energy consumption
- Low power consumption
- Quiet operation

B5BX

T4BX

- Quiet operation
- Low power consumption
- Digital wired control using touch pad and LCD display (H2TB-100, HTB-120)
- Wireless remote control (HTB120, H2TB-100)
- Centralized control; up to 16 modules with weekly timer (HTB120, H2TB-100)
- High static pressure and big air flow (HTB100 -180Pa, HTB120-H2TB100 180-250Pa)
- Belt driven indoor fan (HTBI-120, H2TBI-100)
- Fan speed controller included for static pressure and air flow adjustment (HTB-100)
- Auto error diagnosis (H2TB-100, HTB-120)
- Plug-in electric heater kits (5-15KW)
- Multi positioned: horizontal, vertical, up flow, down flow B5BX
- Liquid line filter drier T4BX
- Heavy gauge galvanized steel with corrosion resistant electrostatic paint
- Adjustable time defrost operation T4BX, TSX
- Copeland Scroll compressor T4BX
- Sanyo scroll compressor TSX
- Danfoss scroll compressor (H2TB-100, HTB-120)

(*) stranded wire

- Compact size for easy installation above fake ceiling
- LCD wired control and wireless remote control
- Centralized control; up to 16 modules with weekly timer
- 4 speed operation +Auto
- Indoor fan stops operating during defrost mode
- Hot Start operation: the indoor coil sensor controls the indoor fan and prevents cold air during start up in heating mode
- Condensate drainpipe in right or left side
- Auto error diagnosis
- Indoor room sensor at the air intake of the indoor unit and inside the controller (user can select one of the two indoor sensors)
- Outdoor temperature indication
- After power failure the unit restarts in the conditions that the user has selected
- Fresh air valve can be defined from the wire-controller (optional)
- Low energy consumption
- Ideal indoor environment with auto mode function
- 24-hour programming

IDI/ULS,ULT

- High/low pressure switch, phase protector and overload protection
- Sensors for high and low pressure protection
- Heavy gauge galvanized steel with corrosion resistant electrostatic paint and blue fin coil

VDI/URS,URT

- Energy class A/A (VDI-24 + URS-24, VDI-45+ URS-45)
- VDI-50+URT-50, VDI-60+URT-60 soon with energy class A/A
- Advanced DC Inverter technology for high efficiency in extreme outdoor conditions
- Mitsubishi DC Inverter Scroll compressor
- Low power consumption and higher efficiency due to New Defrost function
- Quiet operation
- Catechin Filter – eliminates house dust and 95% of microbes
