

Your *natural* conditions

AIR CONDITIONING / TECHNICAL CATALOGUE

2010

# Your conditions!

Since 1916, **inventor** pioneers in the US market, by designing and manufacturing innovative air conditioning and heat pump units.

The company's primary competitive advantage is the use of its know-how expertise gained in the past, to build air conditioning systems of the future.

The key to **inventor** units' success is that they are specifically designed to enable the modern individual invent his own custom made living and working conditions.

Regulating effectively the natural environment, **inventor** units can create silently the perfect indoor conditions; your conditions!

The manufacturing technology used in the production of **inventor** heat pump and air conditioning units ensures their reliable operation according to the highest energy-class standards, achieving maximum performance with minimum consumption rates, respecting the environment.

All **inventor** units carry a 5-year Warranty for the compressor and for all parts of the unit.

**inventor** units can be found all across Europe in a continuously growing selected network of air conditioning professionals!

Their excellent quality and operational efficiency has been awarded by the European Union with the highest standard certificates.

Furthermore, the use of the environmental friendly refrigerants (freon) do not contribute to the increase of the global warming environment.

Listed by applied research laboratories

We recommend Heating & Cooling Equipment with the ENERGY STAR® Logo the Symbol for Energy Efficiency.

## NEW TECHNOLOGIES

### ADVANCED DC INVERTER TECHNOLOGY

- By choosing a DC Inverter air conditioning unit you succeed low energy consumption up to 44% compared to conventional technology.
- In addition, a DC Inverter air conditioning unit approaches and maintains the desired temperature faster, while the operation of the unit is extremely quiet.

### ENERGY CLASS A

- According to the European Union, all electrical appliances are classified from class A to class G in respect of their performance and energy consumption. Consequently seven energy classes are created (from A to G) where A is the most efficient while G is the less one.
- By choosing an Energy Class A unit you succeed the highest performance with the least energy consumption.

### ENVIRONMENTAL FRIENDLY REFRIGERANTS

- **Inventor** units use environmental friendly refrigerants (Freon) R410A and R407C, thus they do not contribute to the increase of the global warming phenomenon and at the same time they protect the environment.

### AUTO CLEAN FUNCTION\*

- Auto Clean Function does not allow mold and bad smells to grow in the indoor unit, while operating in cooling mode.
- When we turn off the unit, the indoor fan continues its operation in low speed. In this way it dries the inner parts of the unit and it does not allow any pollution area to be created.
- This function is activated from the controller.

### TURBO FUNCTION\*

- Turbo Function achieves the desired temperature at minimum time with low energy consumption.

### INTELLIGENT DEFROST

- Power saving and improved heating efficiency by intelligent defrost. INTELLIGENT DEFROST is achieved only by sensors that they control the need and duration of DEFROST PROCESS.

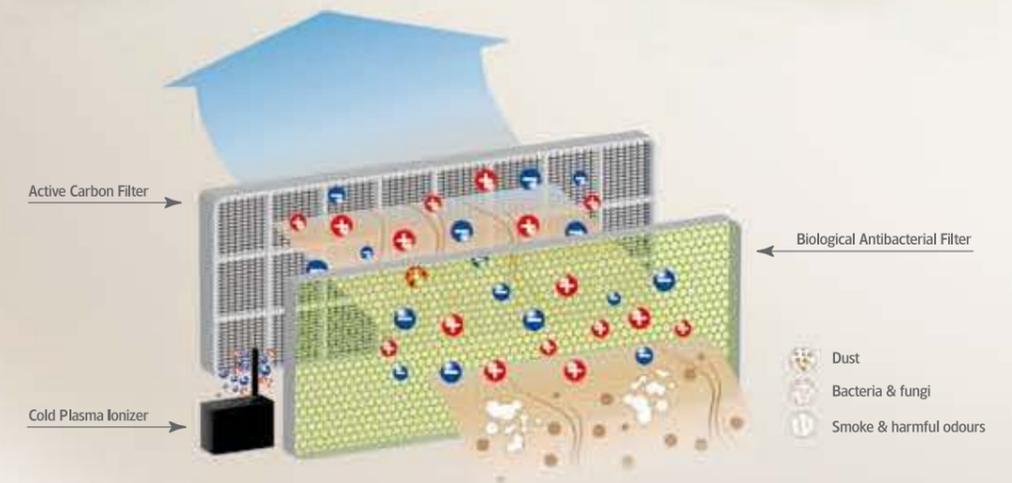

### U-MATCH TECHNOLOGY

- Universal outdoor units ULS/ULT and URS/URT for all residential and ducted units contribute to have a common way to solve technical problems. In addition, the parts are identical and there is no need to have different part for each outdoor.

### COLD PLASMA IONIZER\*

- COLD PLASMA technology is currently one of the most advanced air-cleaning technologies in the world.
- COLD PLASMA Ionizer releases positive and negative ions in the air, thus it disinfects and diminishes bad smells in the room.
- Furthermore it gathers house dust, pollen and other small particles that are responsible for allergies.
- At the same time it generates negative ions, in order to create a safe, healthy and relaxing environment.

### BIOLOGICAL ANTIBACTERIAL FILTER\*

- The Biological Antibacterial Filter has the ability to disinfect the air from bacteria by 95% and at the same time to collect small particles like dust and pollen from the environment.
- When air passing the filter, dust and bacteria are adhered on the surface of filter, where there is bio-bactericide.
- The Biological Antibacterial Filter stops drastically the reproduction and growth of bacteria and as a result, it completely eliminates them.
- It is safe and environmental friendly.

### ACTIVE CARBON FILTER\*

- Active carbon is an extremely absorbent element which has dual function, physical and chemical absorption.
- Due to its technological evolution, active carbon is able to absorb fast, harmful gases from the environment such as petrol, formaldehyde and ammonia.
- Active Carbon Filter offers a clean, odourless and healthy environment.

\* applies to API/APO & CVI/CVO models

## WALL MOUNTED UNITS

### NEW MODELS

APSI

- Energy class A/A (APS-09, APS-12)
- Energy class A/B (APS-18, APS-24)
- Ultra quiet operation
- R410A environmental friendly refrigerant
- Auto Clean Function in cooling mode-protects the inner parts of the unit from mold and odors
- Elegant design
- LCD display and wireless remote control
- Activation and deactivation of the display on demand
- 24-hour programming
- Auto swing louver
- Auto restart
- Higher efficiency and low power consumption due to New Defrost function
- Hot Start operation: the indoor coil sensor controls the indoor fan and prevents cold air during start up in heating mode
- Ideal indoor environment with auto mode function

Rainorange

XVI-09, 12

- Energy class A
- Advanced DC Inverter technology for high efficiency in extreme outdoor conditions
- Ultra quiet operation
- R410A environmental friendly refrigerant
- Elegant design
- 9 colors (optional) for the Ultra Thin panels (see page 15)
- Active Carbon Filter – protects from harmful odors
- Wireless remote control with LCD display
- Auto swing louver
- Auto restart
- 24-hour programming
- Removable and washable panel
- Washable filter
- Steady operation in extreme outdoor conditions without efficiency loss
- Low power consumption

## FLOOR STANDING UNITS

- R410A environmental friendly refrigerant
- LCD display and wireless remote control
- Sanyo Scroll compressor
- Compressor protection function with 3 minutes time delay and 6 minutes minimum operating time (RFO-66)
- Low temperature start; auxiliary heating with electric heater included as standard
- High air flow
- Auto error diagnosis
- Vertical auto swing louver
- 24-hour programming
- Auto restart
- High/low pressure switch, phase protector and overload protection
- Sensors for high and low pressure protection
- Heavy gauge galvanized steel with corrosion resistant electrostatic paint and blue fin coil
- Low power consumption
- Quiet operation

(\*) stranded wire

- Energy class A/A
- Advanced DC Inverter technology for high efficiency in extreme outdoor conditions
- Ultra quiet operation
- Available in red and silver mirror panel
- R410A environmental friendly refrigerant
- Auto error diagnosis
- Auto restart
- LCD display and wireless remote control
- 24-hour programming
- Vertical and horizontal auto swing louver
- Steady operation in extreme outdoor conditions without efficiency loss
- Low power consumption
- Electrostatic air filter traps 97% of all allergens and other airborne dust particulates
- Ideal indoor environment with auto mode function
- Activation and deactivation of the display on demand
- Humidity indication
- Outdoor temperature indication
- Keypad lock on user's demand
- Turbo function – the desired temperature is reached at minimum time
- Auto Clean Function in cooling mode-protects the inner parts of the unit from mold and odors
- Hot Start operation: the indoor coil sensor controls the indoor fan and prevents cold air during start up in heating mode
- Lower energy consumption and higher efficiency due to the New Defrost function

**B5BX INDOOR UNITS**

- Suitable for connection to flexible and metallic ducts
- Durable attractive cabinet
- Multi positioned: horizontal, vertical, up flow, down flow
- 3 speed operation- flexibility of installation
- High static pressure 150 Pa and high air flow
- Emerson motor
- Fully accessible for maintenance
- Plug-in electric heater kits (5-15KW)
- Ability to use with water coil

TSX61

**T4BX OUTDOOR UNITS**

- R410A environmental friendly refrigerant
- Heavy gauge galvanized steel with corrosion resistant electrostatic paint
- Emerson motor
- Copeland Scroll compressor
- High pressure switch
- Liquid line filter drier
- Adjustable time defrost operation
- Five minutes time restart delay
- Guaranteed operation in cooling mode in low outdoor temperatures (-10°C) by using low ambient kit
- Maximum refrigerant line installation up to 54m (horizontal or vertical)

(\*) Τα μοντέλα που κατασκευάζονται στην Αμερική είναι τα T3BX και B5BX

R410A

**IDI**

- Compact size for easy installation above fake ceiling (indoor's height from 27cm up to 33cm)
- High static pressure (150Pa)
- Fresh air valve can be defined from the wire-controller (optional)
- Indoor room sensor at the air intake of the indoor unit and inside the controller (user can select one of the two indoor sensors)
- Condensate pump included with maximum height 1,10m
- Maximum refrigerant pipe length is 50m horizontal and 30m vertical

R407C

**NDI-60**

- Compact size for easy installation above fake ceiling (indoor's height 37cm )
- High static pressure (120Pa)
- High or normal static pressure can be selected by the installer
- Fresh air inlet opening on the side of indoor unit
- Return air suction on the bottom or back side of the indoor unit
- Electric heater kit 3.6kw included as standard

**WIRED AND WIRELESS REMOTE CONTROL**

- 24-hour programming \*
- Sleep mode\*
- Defrost status display\*
- Fresh air status display\*
- Auto error diagnosis\*
- Outdoor temperature display
- Energy saving display

\* Applies for ND series as well

**NEW MODELS**

- R410A environmental friendly refrigerant (IDI/ULS,ULT)
- R407C environmental friendly refrigerant (NDI/NDO)
- Perfect for low profile fake ceilings installations
- LCD wired control and wireless remote control
- Centralized control; up to 16 modules with weekly timer (optional)
- 4 speed operation +Auto
- Indoor fan stops operating during defrost mode
- Hot Start operation: the indoor coil sensor controls the indoor fan and prevents cold air during start up in heating mode
- Condensate drainpipe in right or left side
- High and low pressure switch, Phase reverse protector, Overload protector
- Sensors for high and low pressure protection
- Heavy gauge galvanized steel with corrosion resistant electrostatic paint and blue fin coil
- HITACHI rotary compressor (ULS-24)
- SANYO scroll compressor (ULS-36,ULT-36,ULT60)
- DAIKIN scroll compressor (ULT-50)

## LOW PROFILE DUCTED SPLIT SYSTEMS

DC INVERTER

### WIRED AND WIRELESS CONTROLLER

- 24-hour programming
- Sleep mode
- Defrost status display
- Auto error diagnosis
- Outdoor temperature indication
- Energy saving feature
- Regulation of fresh air status (optional)

- Energy class A/A (VDI-24 + URS-24, VDI-45+ URS-45)
- VDI-50+URT-50, VDI-60+URT-60 soon with energy class A/A
- Advanced DC Inverter technology for high efficiency in extreme outdoor conditions
- R410A environmental friendly refrigerant
- Advanced DC Inverter technology: automatic control of cooling or heating according to indoor temperature resulting in maximum performance with minimum energy consumption
- Mitsubishi DC Inverter Scroll compressor
- Compact size for easy installation above fake ceiling (indoor's height from 27cm up to 33cm)
- Centralized control; up to 16 modules with weekly timer (optional)
- 3 speed operation +Auto
- High static pressure (150Pa)
- High or normal static pressure can be selected by the installer
- Indoor room sensor at the air intake of the indoor unit and inside the controller (user can select one of the two indoor sensors)
- Condensate pump included with maximum height 1,10m
- Indoor fan stops operating during defrost mode
- Hot Start operation: the indoor coil sensor controls the indoor fan and prevents cold air during start up in heating mode
- Ultra low noise level
- High and low pressure switch, Phase reverse protector, Overload protector
- Sensors for high and low pressure protection
- Heavy gauge galvanized steel with corrosion resistant electrostatic paint and blue fin coil
- Catechin Filter – eliminates house dust and 95% of microbes
- Photocatalyst filter – protects from harmful odors
- Steady operation in extreme outdoor conditions without efficiency loss
- Low energy consumption
