Seasonal Efficiency (in accordance to EN14825)

A++ Energy class*

The higher and more efficient performance rating maximizes your energy savings.

Sleep Function

Sleep mode saves energy by gradually increasing (summer) or decreasing (winter) the indoor temperature, to match your body's temperature helping you sleep comfortably.

Auto mode

It sets the unit to heating, cooling, or drying mode offering the ideal room temperature making things easy for you.

Blow/X-fan Function

It eliminates unwanted moisture in the indoor unit during cooling mode operation. After turning off the air conditioner, the indoor unit's fan will keep running for a while in order to dry the indoor unit.

Perfect Start Mode

The perfect start mode technology evaluates the existing room conditions and achieves the ideal starting temperature, regardless of the current environmental conditions. Helps to create a pleasant environment with great energy savings, without any inconvenience.

Hot Start Operation

The indoor coil sensor controls the indoor fan and prevents cold air from entering the room during start up in heating mode.

Auto Restart

Saves the last settings in case of power failure.

Electric Expansion Valve

(L2VI-24/L2V0-24)

*Energy classification refers to the cooling mode
