Inventor Dehumidifiers… banish humidity for good!

Clothes Drying

Take advantage of the special Clothes drying mode and make your life easier. Place the clothes rack in a small room and close the door. The air produced by the Inventor dehumidifier reinforces freshness and ensures dry and fragrant clothes in a short period of time, while keeping the room completely dry. Dry your clothes with all Inventor dehumidifiers by activating the Continuous dehumidification mode or the Clothes drying mode.

Smart Dehumidification (SMD)

Achieve great money and energy savings, thanks to the Smart dehumidification mode. The dehumidifier's power consumption is closely related to the room's temperature. When the temperature is low, the consumption increases while in places with higher temperature the consumption decreases. Under Smart dehumidification mode, the dehumidifier automatically selects the ideal moisture levels according to the room temperature, ensuring low power consumption and excellent conditions in your area.

Dehumidifiers Desiccant & with Compressor

The range of Inventor dehumidifiers consists of Desiccant & Compressor dehumidifiers, to fulfill every single customer's need. The Inventor dehumidifier Rise with Desiccant technology, utilizes desiccant material instead of a compressor and maximizes the performance in conditions of low or no heating. Rise Desiccant dehumidifier is the most appropriate solution for places that are heated only for a few hours per day.
Inventor dehumidifiers with compressor are distinguished for their extremely low power consumption. In places with sufficient heating (over 15°C), you can achieve great energy and money savings, easy and promptly, by choosing among the wide range of Inventor models.
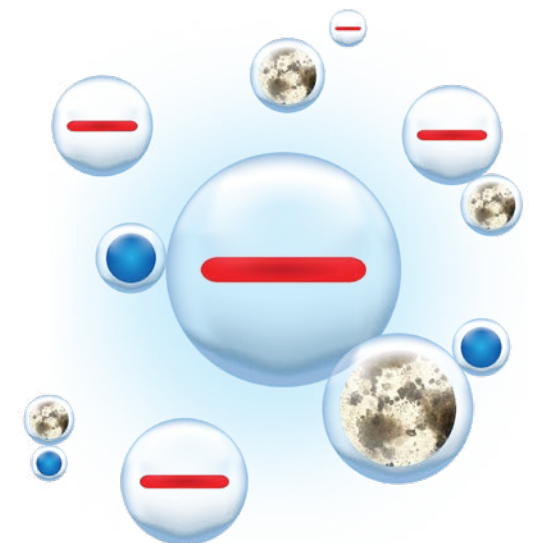

Low Noise Level

Ensure low noise levels by choosing Inventor dehumidifiers with 3 Fan speed levels (Silent - Medium - Turbo). Select the Silent mode of the fan and the dehumidifier will operate at the lowest noise level when it is required. Suitable for use in bedrooms - especially at night- to enjoy ideal sleeping conditions, as well as in areas where absolute silence is needed, ex. study areas.

Ionizer

Ensure a healthy and clean atmosphere in your home with the integrated Ionizer, Inventor dehumidifiers provide. Ions are released into the room absorbing dust, bacteria, tobacco and other unpleasant odors, offering a high air quality.
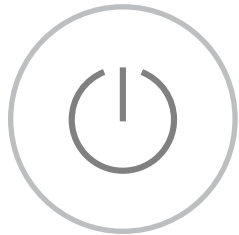

Smart Wi-Fi Technology

Absolute Control

Through the INVmate II application, you can set the desired humidity levels by simply adjusting the white marker - right, clockwise to increase and left to decrease - at a percentage that is ideal for your room.
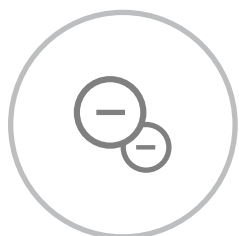

Easy Handling

Turn on & off your dehumidifier even when you are not in the room, simply by pressing the ON / OFF button of the application.
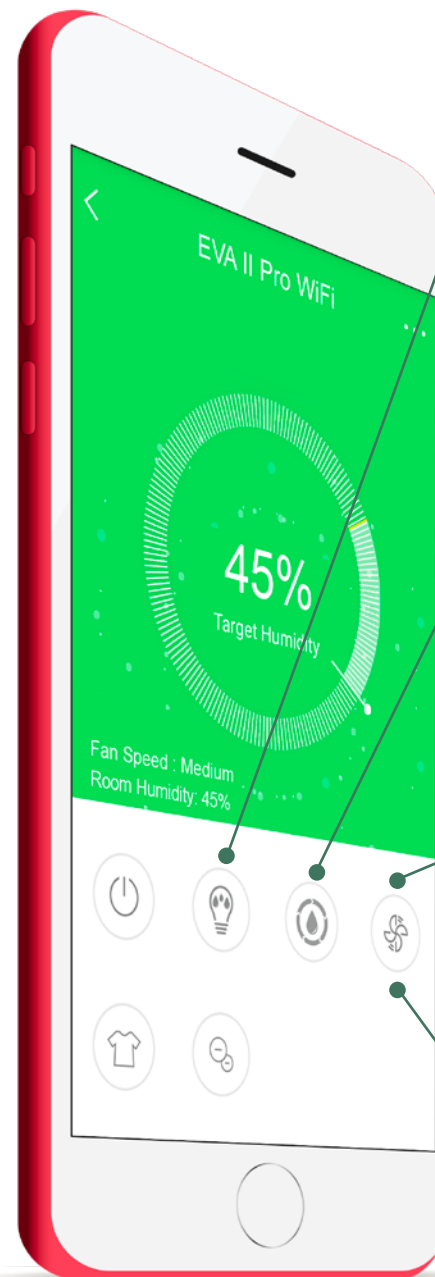

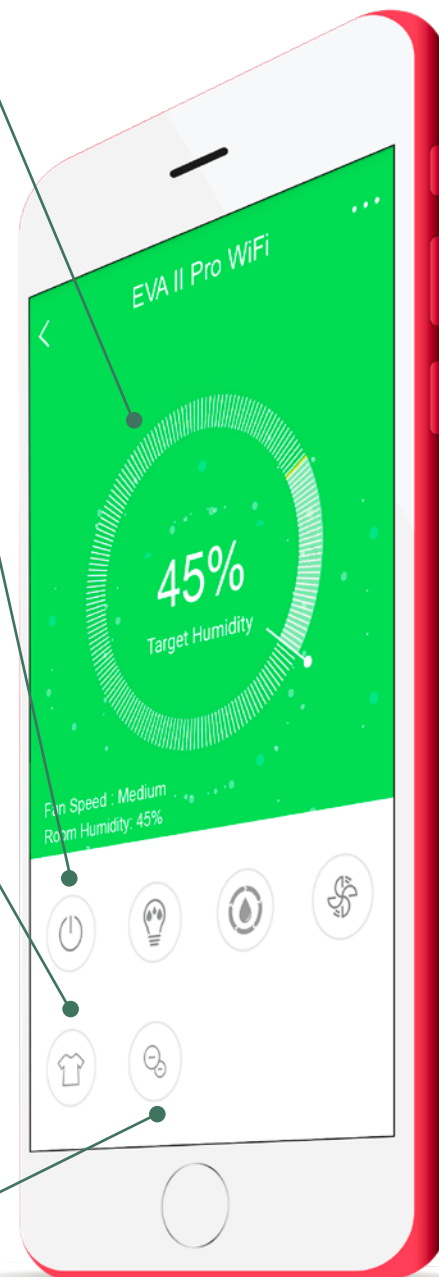

Clothes Drying

The renewed version of INVmate II offers you the flexibility you always needed. The Clothes drying mode is available through the application, in order to achieve dry and fragrant clothes in a short period of time, while keeping the room completely dry.

Ionizer

Ensure a healthy and clean atmosphere in your home - without dust, bacteria, smoke and other unpleasant odors - simply by activating the ionizer function via your Smartphone.

Money Savings

Activate the Smart dehumidification mode via your Smartphone. The dehumidifier will automatically select the ideal moisture levels according to the room temperature, ensuring low power consumption and excellent conditions in your area.
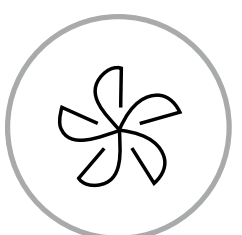

High Performance

Through the INVmate II application the Continuous dehumidification can be set from wherever you are. Activate the Continuous dehumidification mode, when it is required, even when you are not in the room and deal with high demanding cases, such as clothes drying or flooded rooms, banishing the moisture quickly and effectively.

Prompt Efficiency

When the humidity levels in your room are dramatically increased, simply activate the Turbo mode via your Smartphone. The upgraded Turbo mode enhances air extraction and resets, quickly and efficiently, the ideal moisture levels inside the room, offering a pleasant atmosphere.

3 Fan Speeds

Take advantage of the 3 Fan speed levels (Silent - Medium - Turbo). By pressing the Fan button through the application, you can select the dehumidifier's fan speed based on the humidity levels inside the room.
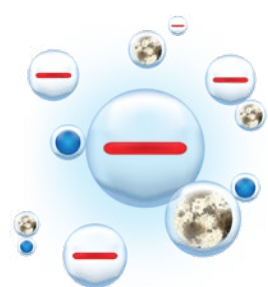

EVA II PRO WIFI

Wi-Fi

Achieve ideal levels of humidity in your area, from wherever you are and enjoy ideal conditions with great energy savings. Free download the INVmate II application through the Google Play or App Store and create the desired environment, whenever you want it, thanks to the smart Wi-Fi technology.

Low Noise Level

Select the Silent mode of the 3 Fan speed levels (Silent - Medium - Turbo) and the dehumidifier will operate at the lowest noise level when it is required. Suitable for use in bedrooms - especially at night - to enjoy ideal sleeping conditions, as well as in areas where absolute silence is needed, ex. study areas.

Wi-Fi

Achieve ideal humidity levels in your place from wherever you are and enjoy ideal conditions with great energy savings. Free download the INVmate II application through Google Play or App Store and create the desired environment, whenever you want to, through the smart Wi-Fi technology. The INVmate II application, is the complete solution of an advanced dehumidifier, to enjoy the benefits of ideal humidity levels in your area, no matter where you are.

Clothes Drying

Dry your clothes in an effective and healthy way with the Dryer operation. Place the clothes rack in a small room (with the door closed) and activate Clothes drying mode. The air produced reinforces freshness and ensures dry and fragrant clothes in a short period of time, while keeping the room completely dry.

Ionizer

Ensure a healthy and clean atmosphere in your home with the integrated Ionizer, Inventor dehumidifiers provide. Ions are released into the room absorbing dust, bacteria, tobacco and other unpleasant odors, offering a high air quality.

Smart Dehumidification

Save money and energy, thanks to the Smart dehumidification function. The dehumidifier automatically selects the ideal moisture levels according to the room temperature, ensuring low power consumption and excellent conditions in your area.

Rise

Enhance Heating

Enhance heating and reduce costs significantly. Thanks to the hot air output, (10°C to 12°C warmer than the room temperature), along with the dehumidification, the room's temperature is enhanced economically and effectively.
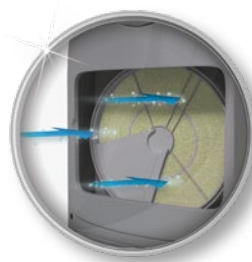

inventor

Rise

WATER

ECO mode

Reduce the power consumption and achieve great money and energy savings. With the ECO mode, the dehumidifier operates economically and the consumption is reduced to the half (330Watt).

Ionizer

Ensure a healthy and clean atmosphere in your home with the integrated Ionizer, Inventor dehumidifiers provide. Ions are released into the room absorbing dust, bacteria, tobacco and other unpleasant odors, offering a high air quality.

Desiccant Technology
(without compressor)

Benefit from the technology of the Desiccant material- without compressor and deal with humidity issues efficiently, at the lowest cost. Desiccant technology offers economical de-humidification in rooms heated only for a few hours per day or with an ambient temperature below 15 °C.
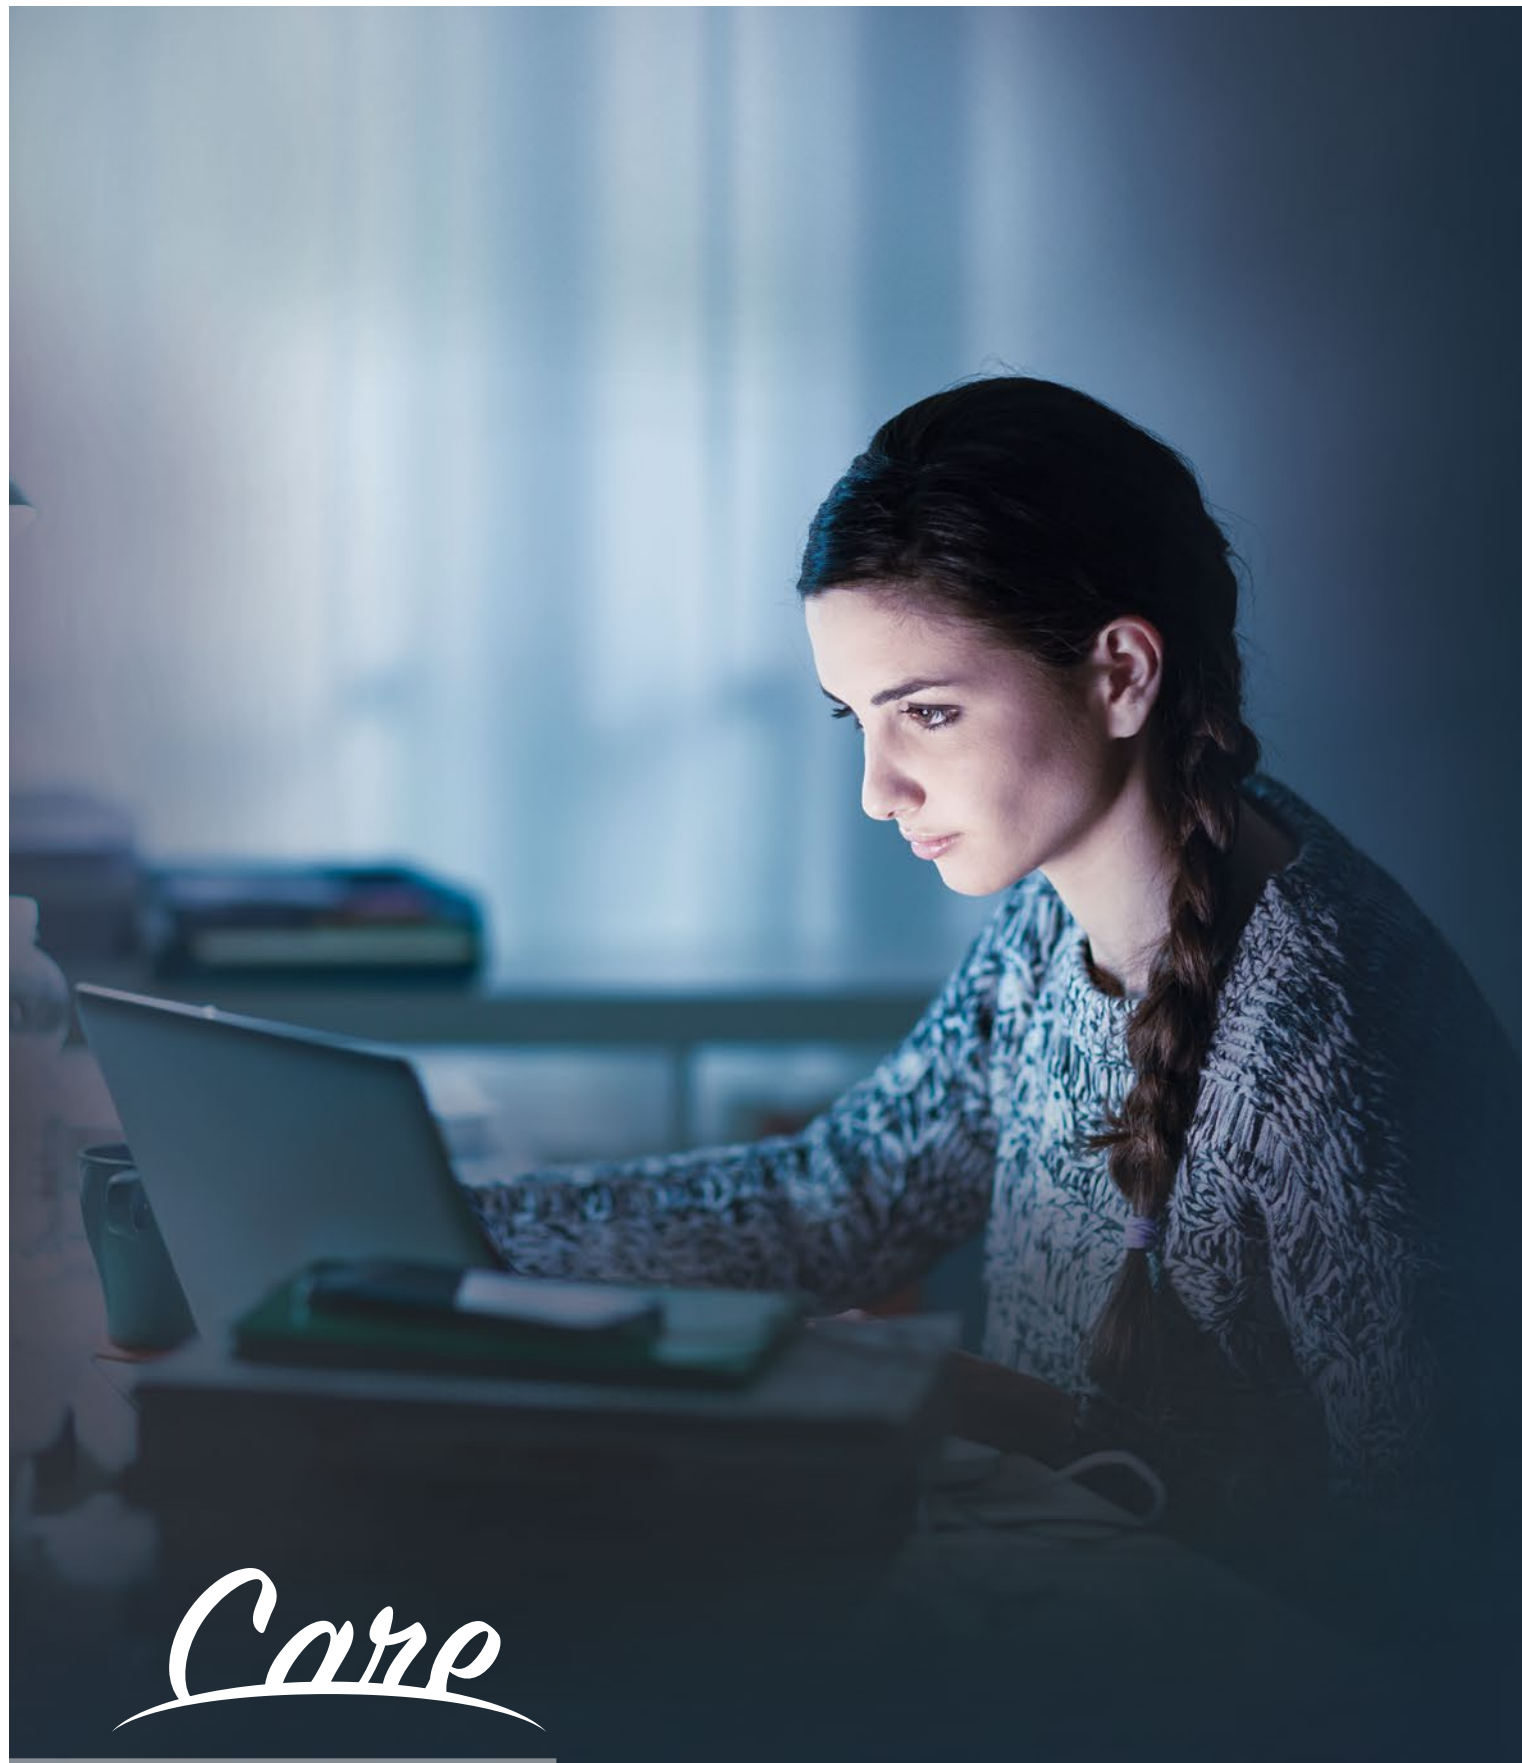

Enhance Heating

Enhance heating and reduce costs significantly. Thanks to the hot air output, (10°C to 12°C warmer than the room temperature), along with the dehumidification, the room's temperature is enhanced economically and effectively.

Quiet Operation

Enjoy quiet operation with the Desiccant dehumidifier, Rise. Desiccant technology - without compressor - gives you a low sound level of operation and an effective hygienic atmosphere without moisture.

Care

Silent

Quietly enjoy a hygienic atmosphere without humidity. Enable Silent mode during the night or at times that require absolute silence and ensure the ideal humidity levels in your room, without hassles.

Continuous Dehumidification

Benefit from the continuous dehumidification operation when immediate results are needed. With continuous dehumidification the dehumidifier acts as a catalyst in conditions of high demand, such as drying clothes or flooded rooms, eliminating moisture quickly and effectively.

Overflow Protection

Enjoy the safe operation of your dehumidifier thanks to the special equipment of protection from overflow. When the water tank is full the dehumidifier automatically switches off and the indication Full illuminates, informing you that the water tank must be emptied, preventing any leakage.

Continuous Drainage

Forget about the continuous emptying of the water tank thanks to the continuous drainage option. Place the hose at the back of the device and plug it into the siphon. The water air collected during the operation of the dehumidifier will flow directly into any selected drain.
