

# The **NAME** in dehumidifiers

**Autonomous  
Air Purifier Operation**

## Ultimately healthy atmosphere

Enjoy a healthy atmosphere free of dust, allergens, bacteria, viruses, germs, etc. The autonomous operation of the appliance as an air purifier ensures all the benefits of an ultimately clean atmosphere in your place as the HEPA filter restrains a great amount of malicious small particles from the air that cause allergies and disease.

During the air purifier operation, the appliance recognizes the quality levels of the atmosphere in your place and instantly acts in order to offer you the clean and pleasant environment you desire.

**Swing Louver**

## Uniform air distribution

Thanks to the Swing function of the dehumidifier, you may easily activate the louver movement facilitating the uniform air distribution throughout the room. At the same time you can choose a specific louver angle addressing the air to the desired point, making it the ideal solution for clothes drying and offering even faster results.

That way you can achieve ultimate comfort and flexibility of choosing the air direction and acquiring totally balanced conditions in the atmosphere of your place as well as impeccable results at the spot you wish.

**Air Quality Indicator**

## Direct air quality diagnosis

The diagnosis of the air status of your house has never been easier and trustworthy! The air quality indicator informs you of the quality of the atmosphere at any time you wish thanks to the luminous indicator placed on an easily spotted place in the front of the unit. Thus, the LED light turns from green to blue to red to notify you of the excellent, good or bad air quality, relevantly.

Therefore, it helps you acknowledge the needs of your place and choose accordingly whether to activate the air purifying operation. That way, you can always achieve the ideal conditions of a healthy and pleasant atmosphere!

ATMOSPHERE

**Dehumidifier  
& Air Purifier**

## Enjoy the benefits of 2 appliances in 1

Thanks to the Atmosphere dehumidifier & air purifier, you can achieve the ideal environment at home, free of any trace of humidity while enjoying clean and healthy air, free of dust and malicious microorganisms. The advanced double function of the appliance allows you to upgrade the quality of the atmosphere in your place in an effective and efficient way, by integrating an appliance of impeccable design in your home. Incorporating a lot of advanced technologies, it can fully adjust to your needs every time of the day and offer a serious improvement of the air quality.

Dehumidifying Capacity	Power Consumption	Noise Level
<b>25/35*</b> (L/24 Hours)	<b>270</b> (W)	<b>39</b> [dB(A)]

\* 25L/day - with the use of HEPA filter  
35L/day - without the use of HEPA filter

Low Noise Level

### Low noise levels for ideal conditions

Enjoy ideal conditions in your house with the completely silent Eva II Pro Wi-Fi series that provides the lowest noise level (37db) combined with great performance.

The low noise levels of Eva II Pro Wi-Fi series provides you with a relaxing and pleasant environment in your place with no disturbing sounds and humidity. Enjoy advanced technology and impressive noise-free results!

Clothes Drying

### Dry and fragrant clothes in no time

Explore the ultimate solution for you to dry your clothes quickly and preserve their lovely smell they had right after taking them out of the washing machine. There is one secret and Inventor dehumidifiers share it with you! Clothes Dryer mode for clean and fresh clothes!

You no longer have to worry about rainy days and high humidity levels! The advanced Clothes Dryer mode of Inventor dehumidifiers, will impress you with the quick and effective results as well as with the particularly low functional cost, ensuring fresh clothes with great energy savings. This unique function will turn the dehumidifier into every housewife's best friend who wishes to save time and win back fragrant clothes!

Smart Dehumidification

### Saving energy and operating cost

Inventor dehumidifiers target is to ensure maximum results with small operating cost.

Smart dehumidification function revolutionizes the economic operation of the dehumidifier with the touch of a single button. Set the dehumidifier to operate in "Smart Dehumidification" and you will be impressed by how readily optimal conditions can be achieved in your area. The dehumidifier automatically selects the desired humidity level between 45% - 55%, always depending on the room temperature, constantly ensuring high quality air with maximum energy savings. Make a «smart» choice and achieve the ultimate relaxing environment.

Wi-Fi

## Wi-Fi control anywhere and anytime

Ensure low functional cost thanks to the Wi-Fi control of Eva II Pro Wi-Fi series! Inventor was the first to incorporate Wi-Fi management to its dehumidifiers so as to offer the absolute control of your device whenever you desire!

Wi-Fi management of the dehumidifier will automatically transform your Smartphone or Tablet into the smartest remote controller, enabling you to check the humidity levels of your place - while you are away - and set the desired humidity percentage. You are now able to turn the dehumidifier on or off and set every function as if you were there. Wi-Fi control is the ultimate ally in the proper operation of your dehumidifier resulting in great energy savings as well as the ideal temperature and humidity conditions, even if you are not at home!

Dehumidifying Capacity	Power Consumption	Noise Level
<b>16</b> (L/24 Hours)	<b>240</b> (W)	<b>37</b> [dB(A)]
<b>20</b> (L/24 Hours)	<b>260</b> (W)	<b>37</b> [dB(A)]

Continuous Dehumidification

### Excellent results even in the most demanding cases

You will be amazed with the results of Inventor dehumidifiers even in the most demanding conditions, meeting every need in an effective way.

In special cases such as rooms with intense humidity or remained shut for a very long period of time, the continuous dehumidification mode makes the dehumidifier work continuously (until the water tank is full) or permanently in the case of connection with the drainage pipe, absorbing humidity from the atmosphere. The device will work incessantly, regardless of the humidity percentage in order to eliminate even the slightest trace of it. You will be amazed by how drastic results can be when having the perfect ally to deal with even the hardest cases!

Overflow Protection

### Trouble-free operation

We always trust the best and the ones who care for us! Inventor dehumidifiers mind their safe operation, preventing from any incident that might worry you!

With overflow protection, you gain full control in order to empty the water tank every time it is full, avoiding potential leaks. The special sound and the light indication will activate to warn you, relieving you from any relevant concern and offering ideal climate conditions in the most safe and efficient way!

### Carefree operation and superb results

Let the experts take care of you, ensuring the safe operation of the dehumidifier. The continuous drainage mode provides exactly what you need.

The drain hose is supplied with the dehumidifier and connects your appliance to the chifon, so you can operate the dehumidifier continuously, without any overflowing risk. Forget about constantly emptying the water tank since water is directly led in the drain and adjust the operation required by the conditions in your area, to fight humidity once and for all.

Continuous Drainage

Dehumidifying Capacity	Power Consumption	Noise Level
<b>10</b> (L/24 Hours)	<b>190</b> (W)	<b>39</b> [dB(A)]
<b>12</b> (L/24 Hours)	<b>200</b> (W)	<b>41</b> [dB(A)]

fresh

Silent

### Silent results with a single touch

Treating humidity in a quiet way is one of Avra series advantage, that contributes not only in improved conditions in your area but also in ideal comfort and tranquility levels. Only with the press of one button, the Silent mode is activated and in a few minutes the atmosphere in your room is upgraded! Humidity in every corner of your home is now gone while you get to enjoy your activities or sleep in absolute silence.

Low Noise Level

## Ideal conditions of tranquility and relaxation

The silent power of Inventor dehumidifiers speaks for itself!

Rise series equipped with Desiccant technology without compressor, offers you the cleanest and healthiest atmosphere that you could ever dream of while you get to enjoy quiet moments of relaxation. Its quality raw materials of manufacturing along with the pioneering technology of its desiccant material, prevent from annoying sounds and guarantee carefree moments of absolute silence. Enjoy the most pleasantly quiet atmosphere in your place!

Ionizer

## Absolutely healthy and clean atmosphere

The ultimate sense of freshness, similar to the one we feel while in nature, can now be magically achieved at home or work environment, thanks to the integrated ionizer, Inventor dehumidifiers provide.

The natural way in which the Ionizer neutralizes the malicious of the atmosphere results in a clean, healthy and fresh environment, completely free of dirt, dust unpleasant scents and micro-organisms. The beneficiary effect of the Ionizer contributes in improving life quality, protecting you from diseases such as asthma and allergies. You will be surprised by the noticeable difference in the air quality of your place and the ultimate levels of comfort and relaxation!

ECO Mode

## Perfect results with the lowest consumption

You can now boost the economic operation of your dehumidifier and achieve cost reduction by half through the ECO mode of Rise dehumidifiers.

Selecting ECO mode, the dehumidifier will operate until humidity level reaches 60% and start again when it increases. With the dehumidifier in ECO mode, consumption reaches 330Watt. This innovative feature helps you avoid unnecessary operating costs, while enjoying perfect conditions in your place.

\*Power Consumption 30W in fan mode / 330W in ECO mode / 650W in TURBO mode

Dehumidifying Capacity	Power Consumption	Noise Level
8 (L/24 Hours)	30/330/650* (W)	39 [dB(A)]

Rise

Enhance Heating

## Enhance the heating of your space

Ideal levels of humidity in the warmest way.

The advanced Desiccant technology of Rise dehumidifier allows the use of the dehumidifier even in extremely cold (1-37) environments, while enhancing heating results, saving energy and money. The air is heated before channeled in the atmosphere, which increases the room temperature. With desiccant dehumidifiers, you can enjoy ideal conditions in your home, as well as reduce the cost of heating by almost 20%. Choose wisely and create instantly and economically, an excellent environment for you and your loved ones!

Clothes Drying

### Dry and fragrant clothes in no time

Explore the ultimate solution for you to dry your clothes quickly and preserve their lovely smell they had right after taking them out of the washing machine. There is one secret and Inventor dehumidifiers share it with you! Clothes Dryer mode for clean and fresh clothes!

You no longer have to worry about rainy days and high humidity levels!
