COOLING CATALOGUE **2020**

innovation

Vegetables and Fruit Humidity Control

Fruits and vegetables are maintained fresh due to the Humidity Controller. Adjust the humidity and ensure a proper environment, with more humidity for vegetables and less for fruits.

ZeroZone – 0°C Drawer

Especially designed the ZeroZone drawer with temperature at 0°C provides perfect conditions for the long-term maintenance of fresh products, such as fish and meat due to its enhanced cooling. The food retains its nutrients and aroma and remain fresh for much longer.

2-in-1 | Freezer or Fridge Mode

Enjoy optimal results with the dual function of the freezers, giving you a choice between preservation or deep freezing. Operate the unit either as a fridge or as a freezer according to your needs and enjoy the benefits of two devices in one!

Fresh Cooling System

Your goods maintain their freshness for a longer period of time, as the Fresh Cooling System ensures temperature stability inside the refrigerator.

Mini Bars

New Mini Bar models, designed specifically for enjoying refreshing soft drinks, alcoholic beverages and your favorite beer, at ideal temperatures. With its transparent glass door, it is simple to check your stock levels at a glance. This is an Ideal solution for hotel rooms, however it is intended for both professional as well as domestic usage.
