Discover Technology

Inventor A.G. S.A. celebrates over five decades of thriving operations in the Greek market, marking a legacy of success. With a strong footprint in air treatment and electric appliances, Inventor has built a reputation for delivering premium-quality products complemented by unique service. Inventor's product portfolio extends its reach to more than 69 countries, facilitated by a well-structured sales network. Dealers benefit from specialized marketing support and dedicated after-sales assistance, ensuring a seamless experience for both B2B and B2C levels.

For ideal conditions at home!

Inventor air conditioners create the perfect environment at your space thanks to upgraded features, while the wide range of dehumidifiers and air purifiers guarantee a healthy atmosphere for you and your loved ones.

For the high demands of each professional

Inventor's commercial air conditioners deliver high-performance, energy-efficient solutions especially designed for businesses. Inventor products are ideal for hotel units, as they are equipped with features such as the Hotel Menu function, a customized engineering mode that allows the centralized control of many devices, offering energy efficiency solutions (i.e., adjusting the set temperature range, remote on/off etc.).

For sustainable energy saving solutions

Inventor designed the Matrix series of air-to-water heat pumps, focusing to environmental sustainability. The Matrix series offer the perfect solution for all heating, cooling, and domestic hot water needs. With its high energy efficiency, the Matrix series not only enhances the comfort of your home but also elevates the energy efficiency rating of your household, leading to significant energy savings.

In 2021 **Inventor becomes part of the world's larger global refrigeration wholesaler, Beijer Ref Group.**

Sustainable temperature control for all!

Inventor is proud to obtain the ESG certificate, manifesting the company's commitment to Environmental, Social, and Governance principles.

Heat Pumps

Tomorrow's technology in heating!

Inventor heat pumps are the ideal energy saving solution, as they are developed to meet the new trends and demands in heating, cooling and domestic hot water (DHW). Combining both, comfort and energy efficiency, they cover the needs of your household while operating efficiently, even in extreme outdoor temperatures!

Heating

Cooling

Domestic Hot Water

* integrated electrical heater 3kW
 ** integrated electrical heater 9kW

The wiring specifications for air conditioners and air-to-water heat pumps should always comply with the local regulations and requirements.

European Keymark certification from the CEN and CENELEC organizations, ensuring that the products have been tested and comply with European quality standards.

Heat Pumps

Inventor always strives to bring tomorrow's technology to your home. The Matrix heat pumps ensure maximum energy savings and comfort, thanks to features such as the energy class A+++, rapid hot water production, two stages of silent operation, and Wi-Fi functionality. Inventor heat pumps are the ideal solution for your space, upgrading your home energy efficiency.

Energy Saving Solution

Meet Inventor heat pumps' high-end features that reduce power consumption, saving energy and money.

Wall Mounted Air Conditioners

Technology for easy living!

Inventor air conditioners are specially designed for high performance all year round, meticulously crafted for excellence in both summer and winter extremes. Their cutting-edge technology offers smart functions, indisputable reliability, and eco-friendly energy-saving solutions. The high standard design is enriched by smart Wi-Fi technology, for absolute control. Enjoy superior air quality and perfect temperature. Inventor's advanced technology makes possible for you to create your ideal conditions for a better life!

Ionizer

Enjoy clean and healthy air as the ionizer ensures the removal of malicious floating particles, such as germs, bacteria, viruses, smoke, dust, odours etc., and offers exceptionally high-quality atmosphere with a sense of freshness.

Hotel
Menu

Save up to 70% energy with Hotel Menu, a customized engineering mode that includes a set of specially designed functions that contribute to a more efficient and economical operation of the air conditioners installed in hotel units.

4 Way
Air Flow

Secure effective air distribution, even at the most difficult to reach parts of the room, thanks to the automatic movement of the swing louvers, both horizontally and vertically.

Ultraviolet Technology Type C & Ionizer

Ensure a germ-free and clean environment with Ultraviolet Type C technology and Ionizer. The UV-C technology eliminates microorganisms with a 265-275nm wave, while the ionizer naturally removes harmful particles like germs, bacteria, pollen, viruses, and odours, providing a consistently fresh atmosphere.

Breeze Away

The Breeze Away function allows you to set the airflow away from you. During Cooling, Fan and Dehumidification modes, the angle of the swing louver will be automatically set at 35° while the fan speed will be adjusted accordingly, so that you can enjoy the right temperature in your place without the unpleasant sensation of the airflow directly pointing at you.

Follow Me

The Follow Me function allows you to set the desired temperature exactly where you are. A smart sensor is located on the remote control and when the Follow Me function is activated the set temperature synchronizes with the smart sensor. Your set temperature will follow you wherever you and the remote go, offering extra comfort and energy savings. Ideal for the long cold days, isn't it?

All-year-round maximum energy savings!

A+++ Energy Class in Cooling & Heating Mode

The technological superiority of the series guarantees excellent performance with the lowest operating costs. Take advantage of the highest energy class A+++ of Inventor air conditioners and create your dream atmosphere while saving money and reducing your energy footprint.

iA Plus (Inverter Algorithm Plus)

The advanced iA Plus algorithm upgrades compressor's operation to the ideal Hz levels, resulting to perfect, low noise operation, in every condition, any given moment. This high-end technology feature not only maximizes energy efficiency, but also ensures that your appliance will sustain its flowless operation for many years to come.

Wi-Fi Standard

Inventor's Wi-Fi Standard air conditioner series includes a USB stick, allowing you to enjoy all the benefits of remote management. Through the smart Wi-Fi function, you create the desired environment from wherever you are. Download the application and save energy by adjusting your air conditioner via your smartphone or tablet.

A+++ Energy Class in Cooling & Heating Mode

The technological superiority of the series guarantees excellent performance with the lowest operating costs. Take advantage of the highest energy class A+++ of Inventor air conditioners and create your dream atmosphere while saving money and reducing your energy footprint.

UVC Technology Type C & Ionizer

Ensure a germ-free and clean environment with Ultraviolet Type C technology and Ionizer. The UV-C technology eliminates microorganisms with a 265-275nm wave, while the Ionizer naturally removes harmful particles like germs, bacteria, pollen, viruses, and odours, providing a consistently fresh atmosphere.

eco ECO Mode

Save energy with the ECO function that automatically adjusts the air conditioner temperature to 24°C, while setting the fan speed to auto. Combine this function with GEAR mode to achieve the most cost-saving performance of the compressor.

Impressive aesthetics & high-quality clean air!

A+++ Energy Class in Cooling & Heating Mode

The technological superiority of the series guarantees excellent performance with the lowest operating costs. Take advantage of the highest energy class A+++ of Inventor air conditioners and create your dream atmosphere while saving money and reducing your energy footprint.

Aqua Ionizer

Create a healthy environment of pure, fresh air, using the Aqua Ionizer. This advanced feature purifies air through positive and negative ions, which neutralize harmful airborne particles, naturally and effectively.

4 Way Air Flow

Enjoy perfect air flow and ideal temperatures even at the most difficult to reach parts of the room – like under the stairs or in high-ceiling spaces – with the automatic movement of the swing louvers. The air outlet louvers automatically move horizontally and vertically ensuring that the air is evenly distributed towards all directions.

Commercial Air Conditioners

Technology for business excellence

Benefit from Inventor's expertise in professional solutions and upgrade the energy efficiency of your business while creating the ideal environment for your colleagues.

Multi-split Air Conditioners

The multi-split air conditioners have a wide variety of indoor units and thus, offer a variety of combinations. The possibility of connecting up to 5 indoor units with one outdoor unit offers flexible installation and provides solutions for spaces with construction difficulties. In addition, thanks to the high energy class, the Inventor multi-split air conditioners ensure excellent performance and energy saving.

LCAC

The wide range of Inventor's Light Commercial air conditioners ensures perfect adaptation to every need. The special design of the units makes it possible to meet the needs of the most demanding installations, even with limited space. They are ideal for both small and large commercial premises, as they offer excellent performance with simultaneous energy saving, as their control is simple and easy through a centralized controller.

Multi-Split Air Conditioners

Connect up to 5 indoor units with one outdoor unit according to your needs and enjoy the excellent atmosphere in every space.

Integrated Digital Management Service

Inventor commercial air conditioners can be integrated into your Building Management System (BMS), ensuring comprehensive control of your business. Create a unified ecosystem by incorporating air conditioning into the same central management system as ventilation, lighting, and security systems, guaranteeing their seamless alignment with your building's needs instantly, easily, and efficiently.

Advantages of BMS:

1. Full control of Inventor air conditioners connected to the system via the Modbus RTU communication protocol*.
2. Monitoring and adjustment of air conditioner operations remotely according to evolving needs.
3. Immediate fault detection and, consequently, swift issue resolution.
4. Automation of functions to reduce the likelihood of human error.
5. Energy savings and, by extension, operational cost reduction for the enterprise.

*Purchase of a gateway is required.

Portables

Technology for flexible solutions

Discover the perfect cooling and heating solution for confined spaces using Inventor portable air conditioners. Tailormade for homes with limited room for permanent installations, these units offer flexible and efficient cooling without the need for a fixed setup. Achieve the ideal conditions effortlessly and economically, both in summer and winter, ensuring quick and convenient climate control year-round. Ideal for your vacation house, isn't it?

Dehumidifiers

Technology for healthy atmosphere

Inventor dehumidifiers are meticulously crafted to foster a health-conscious environment. By efficiently eliminating excess moisture, they focus on enhancing air quality, free from germs, dust, and bacteria. They also help prevent the growth of mold on various surfaces such as clothing, furniture, and walls. The advanced technologies applied guarantee an ideal level of humidity in the room to create a better atmosphere.

Rating conditions: Dehumidifying Capacity: 30°C - 80%RH / Power Consumption 26,7°C - 60%RH

Rating conditions: Dehumidifying Capacity: 30°C - 80%RH / Power Consumption 26,7°C - 60%RH

** Power Consumption 30W in fan mode / 330W in ECO mode / 650W in TURBO mode.

Air Purifiers

2
YEARS
WARRANTY

Technology for comfort & ideal conditions

Upgrade the air quality of your space by investing in an air purifier. Experience the effective enhancement of the air quality, as the purifier creates a fresh and healthy atmosphere. The numerous filtration stages, the low energy consumption, the HEPA filters and the various sensor indicators are some of the unique advantages of Inventor's air purifiers that stand out.

Air Purifiers

Smart Applications

Inventor technology at your service!

Connect & get full control of your appliances!

The Inventor Control App offers you complete control over your Inventor appliances, from any location. The app provides you with numerous possibilities to adjust the operation of the devices based on your needs, by creating personalized scenarios. Use the weather forecast, your everyday schedule or the conditions that may arise during the day and let your devices operate automatically, only for you!

- **Central Control of Inventor Appliances**
The app serves as the centralized hub for managing all your Inventor appliances.
- **Automatic Notifications**
Receive real-time notifications to stay informed about the status and performance of your appliances.
- **Weekly Schedule**
The app allows you to automate device operations at specific times and on designated days.
- **Voice Command Function**
Experience hands-free control through the voice command feature.
- **Smart Scenarios**
Design specific scenarios to meet your individual preferences and needs.

The most useful app for every technician!

The Inventor My PARTNER app is designed for professionals requiring instant information. This application provides qualified technicians with seamless and direct access to user manuals and essential technical data for installation, maintenance, or first level diagnose. It allows technicians to effortlessly search for compatible spare parts, ensuring a swift process with no waiting time.

Inventor Control APP is compatible with Google Assistant*, Amazon Alexa** and Siri Shortcuts.

* Google is a trademark of Google LLC. Google Assistant is not available in certain languages and countries.
