The World of **Inventor** Air Conditioners!

Created by the largest Air Conditioner manufacturers globally, Inventor units enjoy a sound reputation of exceptional quality and outstanding performance!

Who we are!

50 years of experience, countless satisfied customers in more than 50 countries in the world!

Our Mission!

Inventor aims at offering the Air Conditioning professional and end-user, top quality products at competitive prices.

We offer products and services flexible to meet the specific needs of any individual, this is «Your Conditions».

Our wide product range mix is continuously updated; new products are introduced annually after closely monitoring the global Air Conditioning market, as well as the social and environmental trends.

Our client is the center!

- We offer:**
- Innovative top quality products at the most competitive prices
 - 5* year warranty of excellent performance
 - Unique after sales services
 - Products according to specific local demands

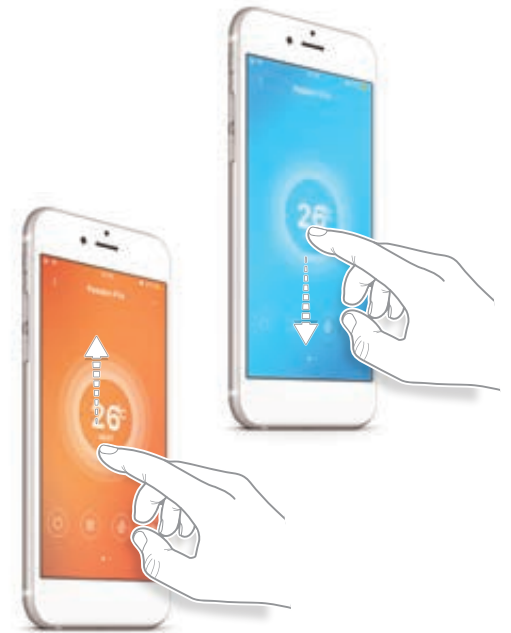

* We offer to our international partners a 5 (five) year warranty for the compressor and 5 (five) year for the electrical/mechanical parts of all air-conditioning units (9.000 - 60.000 Btu/h). The 5 year excellent performance warranty is valid for Residential and Light Commercial range of products, starting from the delivery date of the units.

Smart WiFi Technology

A close-up photograph of a person wearing a pink shirt, holding a tablet computer. The person is looking at the screen, which displays a blue interface with several circular icons. The background is a blurred outdoor scene with green foliage and a wooden fence. The overall lighting is bright and natural, suggesting an outdoor setting.

Control your climate
easily from wherever...
with your Tablet
or Smartphone

Increase or reduce the temperature of your air conditioner, from wherever you are, just with a touch of your mobile device screen, by sliding upwards or downwards depending on the desired temperatures.

Choose the mode you prefer and the mobile device screen will change color automatically. One color for each mode, to indicate the status of the air.

Weekly Planner

Save energy and forget the on/off button of your air conditioner. Use the innovative feature of Invmate II, Weekly Planner, and schedule the temperature of your home and/or office according to your plans!

Sleeping Curve

Enjoy the ideal conditions in your room, by adjusting the temperature for every sleeping hour.

Check Diagnosis

With the 97 checking points of the check diagnosis function, the Invmate II ensures that you will never miss a thing!

New Outdoor Design

The redesigned outdoor units are sturdier and easier for maintenance. The upside-down electrical box keeps the electrical parts dust free (up to 70% dust reduction) and the heating performance is increased even in lower outdoor temperatures.

Excellent Heating Performance at -25°C

With the special design of the outdoor unit, which includes Chassis Heating Belt & Compressor Heating Belt, excellent heating performance is achieved, extended to -25°C and -15°C increasing the heating capacity by 47%.

8°C Heating

Prevent potential weather damages in places that are not heated and pose risks during the winter. Enable the 8°C function and the air conditioner only heats the room as needed while maintaining a stable room temperature of 8°C.

Protect your assets and enjoy low energy consumption that maximizes your energy savings throughout the winter.

Low Ambient Cooling

The outdoor unit's special design produces an efficient and effective cooling operation even at -15°C .

Green Fin

High anti-corrosion hydrophilic aluminum foil coating (Organic resin). The coating can withstand the salty air, rain and other corrosive elements. Not only protects the outdoor unit but also improves the performance of the unit.

R32

The new ECO refrigerant, with no impact on the ozone layer and lower global warming potential (GWP) impact.

R32 has no toxicity, it is a low cost refrigerant and energy efficient.

GOOD DESIGN AWARD 2015

Passion Pro is the Winner of 2015 Good Design Award competition. The innovative design and the unique structure of Passion Pro were the award winning elements.

Easy Clean

50% saving on cleaning time, with Passion Pro easy removable filters, that can be pulled out at the top instead of inside the panel, installation steps are decreased from 9 to 3!

Direct pull out filter

Easy Installation

Save 20% time on installation, due to strong installation plate and cupboard of Passion Pro. Big space for piping/wiring connection & improved wiring terminal.

Direct remove panel

Slide out chassis

Triple Action Filter

Triple Action Filter with Vitamin C, Silver Ion and Cold Catalyst protects your skin and improves the air.

Vitamin C: It increases collagen production.

The filtered air softens the skin and reduces stress.

Silver Ion: The Silver Ions eliminate the existing bacteria and microbes in the air. It provides fresh odorless air, helping to prevent mold.

Cold Catalyst: It absorbs odors and harmful gases from the environment while successfully eliminating formaldehyde and volatile organic compounds (VOCs).

High Density Air Dust Filter

The exquisite filter optimizes the filtering effect by 40%.

Filter Check

Checking if the filter is clean is not necessary anymore with Filter Check (filter control function).

The CL indicator will light up on the screen when the filter needs to be cleaned. Enjoy pure, fresh dustless air!

Powerful Self-Cleaning

With a touch of a button on the remote control your air conditioner cleans itself! The process only takes 17 minutes. When it is finished, the unit is ready to be used again, clean from bacteria and fungi, providing fresh and clean air. The unit then powers down and remains ready for the next use.

Ionizer Filter

The ions released in the air, give you a fresh and clean atmosphere, by capturing dust and smoke, offering wellness and high quality room conditions.

Sterilization HEPA Filter

Removes even the smallest dust particles from the air. Also removes allergy and viral disease causing microbes, filling your room with healthy pure air.

Plasma Ionizer

Effective sterilization kills 80% more bacteria, removes odors, and creates air nutrition improvement with more negative oxygen ions.

Superpower Ionizer

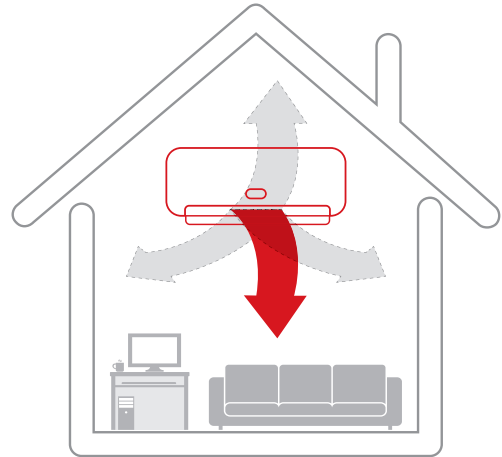

The Superpower Ionizer produces positive and negative ions. When these ions collide they release an enormous energy which destroys odors, dust and smoke while leaving your environment clean and fresh.

4 Way Air Flow

The renewed design creates uniform air distribution in all dimensions. The vent swings not only move horizontally but vertically as well, dispersing the air smoothly even in the most difficult spots.

Follow Me

A smart sensor is located on the remote control. When the iFeel function is activated the set temperature synchronizes with the smart sensor. Your set temperature will follow you wherever you and the remote go offering extra comfort and energy savings.

Temperature Sensor Offset

The temperature detected by the indoor unit temperature probe will often be different from the actual ground temperature, due to the indoor units being installed at different heights. This feature can correct the temperature difference.

Central Control

Choose among the huge variety of controllers, based on your needs. Centralized (for up to 64 indoor units), front desk, touch pad wired controller, wifi and many others.

Mute Mode

Want to turn off the AC beep and display? By pressing the mute operation Inventor AC helps to give you a quiet and comfortable night.

Ultra Silence Mode

Activate the Ultra Silence Mode and enjoy an absolute feeling of pure silence in your room.

Sleep Mode

With the Sleep Mode, the air conditioner, adjusts the room temperature for perfect sleeping conditions and energy saving.

WiFi Ready

Control your climate easily from wherever, with your Smartphone or Tablet. Download the app, Invmate II, for free via Google Play & App Store and set your temperature conditions.

Superpower Ionizer

The Superpower Ionizer produces positive and negative ions. When these ions collide they release an enormous energy which destroys odors, dust and smoke while leaving your environment clean and fresh.

Follow Me

A smart sensor is located on the remote control. When the iFeel function is activated the set temperature synchronizes with the smart sensor. Your set temperature will follow you wherever you and the remote go offering extra comfort and energy savings.

A+++ in Heating Warm Zone

Excellent heating operation, for maximum energy saving.

Plasma Ionizer

Effective sterilization kills 80% more bacteria, removes odors and creates air nutrition improvement with more negative oxygen ions.

Blow Xfan

It eliminates unwanted moisture in the indoor unit during cooling mode operation. After turning off the air conditioner, the indoor unit's fan will keep running for a while in order to dry the indoor unit.

Multi Split Outdoor Units

Energy Class

All DC Inverter

Auto Error Diagnosis

Quiet Operation

Central Control Management (Optional)

Green Fin

High anti-corrosion hydrophilic aluminum foil coating (Organic resin). The coating can withstand the salty air, rain and other corrosive elements. Not only protects the outdoor unit but also improves the performance of the unit.

Flexible Installation

Maximum total pipe length up to 75m.

Wide Operation Range

With up to 25 stages (F1-F25) compressor frequency. The frequency range is increased as much as 70%, allowing the system to run smoothly. It also provides accurate control for a comfortable environment and great energy savings.

Low Ambient Cooling

The outdoor unit's special design produces an efficient and effective cooling operation even at -15°C.

Electronic Expansion Valve Per Circuit

The independent electronic valve of each indoor unit, offers better operating control and efficiency.

Central Control Management (Optional)

Wired Control (Optional)

Error Alarm Port

Front Desk Control (Optional)

Auto Error Diagnosis

Wide Angle Air Flow

This special design provides a wide and very comfortable airflow, for greater air circulation.

Quiet Operation

This feature refers to the reduced noise emissions in order to achieve a pleasant and comfortable unit operation.

Double Air Outlet

Air outlets on the top and bottom to enjoy fast heating, while ensuring running cost are kept low.

360° Air Outlet

Enjoy optimum comfort, anywhere in the room. 360 degree directional wind coming out from 8 instead of 4 air outlets, can deliver air evenly throughout every corner in any space. Supplying 360 degree, even airflow, reduces hot and cold spots in the space providing ultimate comfort.

External Air Duct Outlet

With the special structure of the indoor unit, an extra duct can supply air to another room. Suitable for air conditioning extra small rooms.

Fresh Air Intake

Provided to handle the fresh air load for a clean and healthy environment.

Multi Split Indoor Units

Central Control Management (Optional)

Wired Control (Optional)

Error Alarm Port

Front Desk Control (Optional)

Auto Error Diagnosis

Super Slim Design

Smaller indoor unit height compared to the conventional indoor units.

Two Air Inlet Styles

Choose between the bottom or the rear side for the air intake. It can fit all needs of the installations. Flexible air intake from the back or the bottom part of the unit.

Fresh Air Intake

Provided to handle the fresh air load for a clean and healthy environment.

Built-in Drain Pump

The drain pump can lift the condensing water up to 750mm.

Front Desk Control (Optional)

360° Air Outlet

Enjoy optimum comfort, anywhere in the room.

360 degree directional wind coming out from 8 instead of 4 air outlets, can deliver air evenly throughout every corner in any space.

Supplying 360 degree, even airflow, reduces hot and cold spots in the space providing ultimate comfort.

Built-in Drain Pump

The drain pump can lift the condensing water up to 750mm.

External Air Duct Outlet

With the special structure of the indoor unit, an extra duct can supply air to another room. Suitable for air conditioning extra small rooms.

Fresh Air Intake

Provided to handle the fresh air load for a clean and healthy environment.

2 Optional Air Outlet Ways

Choose between the bottom or the top and bottom air outlet.

Ideal solution that provides stable room temperature even in the difficult installations.

Quiet Design

The indoor units are designed to offer ideal air conditioning with a low noise level, enjoy the ideal temperature and the silence.

Central Control Management (Optional)

The centralized multi-functional device can control up to 64 indoor units within a maximum connection length of 1200m.

Low Ambient Cooling

The outdoor unit's special design produces an efficient and effective cooling operation even at -15°C.

Fresh Air

With the fresh air intake, the room's air will always be fresh and healthy. Outside air can be led into the room via a connection pipe, which keeps the indoor air fresh and healthy.

4 Way Air Flow

The renewed design creates uniform air distribution in all dimensions. The vent swings not only move horizontally but vertically as well, dispersing the air smoothly even in the most difficult spots.

Low Ambient Cooling

The outdoor unit's special design produces an efficient and effective cooling operation even at -15°C.

Temperature Sensor Offset

The temperature detected by the indoor unit temperature probe will often be different from the actual ground temperature, due to the indoor units being installed at different heights. This feature can correct the temperature difference.

All DC Inverter

Auto Error Diagnosis

Central Control Management (Optional)

Error Alarm Port

Front Desk Control (Optional)

Two Air Inlet Styles

Choose between the bottom or the rear side for the air intake. It can fit all needs of the installations. Flexible air intake from the back or the bottom part of the unit.

Built-in Drain Pump

The drain pump can lift the condensing water up to 750mm.

Low Ambient Cooling

The outdoor unit's special design produces an efficient and effective cooling operation even at -15°C .

Fresh Air Intake

Provided to handle the fresh air load for a clean and healthy environment.

Floor Standing

Auto Restart

After a power failure, the device will automatically start with the previous settings.

24-Hours Timer

Set the unit to start and stop automatically in a 24h period.

Hot Start

The indoor coil sensor controls the indoor fan and prevents cold air from entering the room during start up in heating mode.

Auxiliary Heater

Plug-in electric heater, for higher efficiency in heating even in very low weather conditions.

Smart AC

WiFi Ready
Control your climate easily from wherever, with your Smartphone or Tablet.

Reliability

A Energy Class
High energy efficiency.

A+ Energy Class
Efficient performance that guarantees, lower energy consumption.

A++ Energy Class
The higher and more efficient performance rating maximizes your energy savings.

A+++ Energy Class
Excellent heating operation for maximum energy saving.

Auxiliary Heater
Plug-in electric heater, for higher efficiency in heating even in very low weather conditions.

All DC Inverter
The fan motors of the indoor and outdoor units as well as the compressor have been upgraded to All DC Inverter technology. In this way, the compressor can change the capacity depending on the needs of the indoor atmosphere and create perfect conditions in your space.

Auto Error Diagnosis
Once abnormal operation or parts failure happens, the unit will shut off automatically to protect the system. Meanwhile it will indicate protection or error code for fast service.

Built-in Drain Pump
The drain pump can lift the condensing water up to 750mm.

Central Control Management (Optional)
The centralized multi-functional device can control up to 64 indoor units within a maximum connection length of 1200m.

Electronic Expansion Valve Per Circuit
The independent electronic valve of each indoor unit, offers better operating control and efficiency.

Emergency Using
When temperature sensor error happens, the air conditioner will display error code and stop immediately, while AC displays error and continues running in a proper status, to avoid the case that AC is in urgent need.

Error Alarm Port
An indicator of an error code will appear if an error occurs.

Excellent Heating Performance at -25°C
With the special design of the outdoor unit, which includes Chassis Heating Belt & Compressor Heating Belt, excellent heating performance is achieved, extended to -25°C and -15°C increasing the heating capacity by 47%.

Excellent Heating Performance Under -15°C
Excellent heating operation even in -15°C.

Front Desk Control (Optional)
With a smart control board, air conditioners can be turned on/off via long distance control signals.

Green Fin
High anti-corrosion hydrophilic aluminum foil coating (Organic resin). The coating can withstand the salty air, rain and other corrosive elements.

Lock
Engage the lock function to prevent anyone from changing the settings or children playing with the unit.

Low Ambient Cooling
The outdoor unit's special design produces an efficient and effective cooling operation even at -15°C.

R32
The new ECO refrigerant, with no impact in the ozone layer and lower global warming impact. R32 has no toxicity, it is a low cost refrigerant and energy efficient.

Refrigerant Leakage Detect
Indoor unit will show error code "EC" and will stop automatically when refrigerant leakage is detected.

Icons Guide

Wired Control (Optional)

Compared with infrared remote control, wired control can be fixed on the wall and avoid mislaying. It's mainly used for commercial zone and makes air conditioner control more convenient.

1W StandBy

Power consumption from 1.0W in StandBy mode for higher energy savings.

0.5W StandBy

Power consumption from 0.5W in StandBy mode for higher energy savings.

8°C Heating

Prevent potential weather damages in places that are not heated and pose risks during the winter. Enable the 8°C function and the air conditioner only heats the room as needed while maintaining a stable room temperature of 8°C.

Design

Good Design Award

Passion Pro is the Winner of 2015 Good Design Award competition. The innovative design and the unique structure of Passion Pro were the award winning elements.

Easy Installation

Save 20% time on installation, due to strong installation plate and cupboard of Passion Pro. Big space for piping/wiring connection & improved wiring terminal.

Easy Clean

50% saving on cleaning time, with Passion Pro easy removable filters, that can be pulled out at the top instead of inside the panel, installation steps are decreased from 9 to 3.

New Outdoor Design

The redesigned outdoor units are sturdier and easier for maintenance. The upside-down electrical box keeps the electrical parts dust free (up to 70% dust reduction) and the heating performance is increased even in lower outdoor temperature.

Clean Air

Blow Xfan

It eliminates unwanted moisture in the indoor unit during cooling mode operation. After turning off the air conditioner, the indoor unit's fan will keep running for a while in order to dry the indoor unit.

Filter Check

Checking if the filter is clean is not necessary anymore with Filter Check (filter control function). The CL indicator will light up on the screen when the filter needs to be cleaned.

Fresh Air

With the fresh air intake, the room's air will always be fresh and healthy. Outside air can be lead into the room via a connection pipe, which keeps the indoor air fresh and healthy.

High Density Air Dust Filter

The exquisite filter optimizes the filtering effect by 40%.

Ionizer Filter

The ions released in the air, give you a fresh and clean atmosphere, by capturing dust and smoke, offering wellness and high quality room conditions.

Plasma Ionizer

Effective sterilization kills 80% more bacteria, removes odors and creates air nutrition improvement with more negative oxygen ions.

Powerfull Self-Cleaning

With a touch of a button on the remote control your air conditioner cleans itself! The process only takes 17 minutes. When it is finished, the unit is ready to be used again, clean from bacteria and fungi, providing fresh and clean air.

Sterilization HEPA Filter

Removes even the smallest dust particles from the air. Also removes allergy and viral disease causing microbes, filling your room with healthy pure air.

Superpower Ionizer

Produces positive and negative ions. When these ions collide they release an enormous energy which destroys odors, dust and smoke while leaving your environment clean and fresh.

Triple Action Filter

Triple Action Filter with Vitamin C, Silver Ion and Cold Catalyst protects your skin and improves the air.

Comfort

12 Grades Indoor Fan Speeds
Up to 12 grades indoor fan speeds, ensure more accurate control and brings more comfortable air flow.

2 Way Draining
Both left and right sides of the indoor unit are possible for drainage hose connection, easy for installation.

2 Way Draining Connection
The drainage hose can be connected in both left and right side of the console for easy installation.

24-Hours Timer
Set the unit to start and stop automatically in a 24h period.

2 Optional Air Outlet Ways
Choose between the bottom or the top and bottom air outlet. Ideal solution that provides stable room temperature even in the difficult installations.

360° Air Outlet
Enjoy optimum comfort, anywhere in the room. 360 degree directional wind coming out from 8 instead of 4 air outlets, can deliver air evenly throughout every corner in any space.

4 Way Air Flow
The renewed design creates uniform air distribution in all dimensions. The vent swings not only move horizontally but vertically as well dispersing the air smoothly even in the most difficult spots.

5 Grades Outdoor Fan Speeds
Due to the DC fan motor, outdoor fan speeds increase from 2 grades to 5 grades, more comfortable and reinforces energy saving.

Anti-Cold Air Function
Indoor fan speed is regulated automatically from the lowest grade to the setting grade according to the evaporator temperature when the unit starts heating operation.

Automatic Operation
After setting the desired temperature, the unit will automatically adjust its operation in order to keep stable the temperature you have set.

Auto Swing
This function refers to the automatic flaps' movement. The automatic operation enables you to manage a distribution of the air in the room.

Auto Swing Louver
Distributes cool/warm air to maximum area by moving horizontal flaps automatically.

Auto Restart
If the air conditioner breaks off unexpectedly due to the power cut, it will restart with the previous setting mode automatically when the power resume.

Central Control
Centralized (for up to 64 wired units), front desk, touch pad wired controller, wifi and many others.

Compact Design
The unit's design enables it to occupy the minimum possible space inside the room.

Cooling & Heating
Strong enough to cool or heat, up to 23m².

Double Air Outlet
Air outlets on top and bottom to enjoy fast heating, while ensuring running cost are kept low.

External Air Duct Outlet
With the special design of the indoor unit, an extra duct can supply air to an other room. Suitable for air conditioning extra small rooms.

Flexible Installation
Maximum total pipe length up to 75m.

Follow ME
A smart sensor is located on the remote control. When the iFeel function is activated the set temperature synchronizes with the smart sensor.

Fresh Air Intake
Provided to handle the fresh air load for a clean and healthy environment.

Hot Start
The indoor coil sensor controls the indoor fan and prevents cold air from entering the room during start up in heating mode.

Low Noise Level
50dB(A) noise level for comfortable cooling rooms.

Louver Position Memory
Horizontal louver will automatically move to the same position as you set last time when the unit turned on.

Icons Guide

Mute Mode

By pressing mute operation you can turn off the AC beep and display in order to achieve a quite and comfortable sleep.

Omni-Directional Caster

The integrated swivel casters make the portable AC easier to move.

Quiet Design

The indoor units is designed to offer ideal air conditioning with a low noise level enjoy the ideal temperature and the silence.

Quiet Operation

This feature refers to the reduced noise emissions in order to achieve a pleasant and comfortable unit operation.

Self Evaporating System

Innovative system that automatically removes condensed moisture from the unit without manual draining or setting up a hose for continuous drainage.

Sleep Mode

With the Sleep Mode, the airconditioner adjusts the room temperature for perfect sleeping conditions and energy saving.

Super Slim Design

Smaller indoor unit's height compared to the conventional indoor units.

Temperature Sensor Offset

The temperature detected by the indoor unit temperature probe will often be different from the actual ground temperature, due to the indoor units being installed at different heights.

Two Air Inlet Styles

Choose between the bottom or the rear side for the air intake. It can fit all needs of the installations. Flexible air intake from the back or the bottom part of the unit.

Turbo Mode

This function gives you a boost in cooling and heating power for a period and makes the room cool down or heat up rapidly.

Ultra Silence Mode

Activate the Ultra Silence Mode and enjoy an absolute feeling of pure silence in your room.

Wide Angle Air Flow

The special design provides a wide and very comfortable airflow, for greater air circulation.

Wide Operation Range

With up to 25 stages (F1-F25) compressor frequency. The frequency range is increased as much as 70%, allowing the system to run smoothly.
