# Inventor Dehumidifiers... banish humidity for good!

## Desiccant Dehumidifier (without compressor)

Inventor dehumidifier with Desiccant technology, utilizes desiccant material instead of a compressor and maximizes the performance in conditions of low or no heating. Rise Desiccant dehumidifier is the most appropriate solution for places that are heated only for a few hours per day.

## Dehumidifiers with compressor

Inventor dehumidifiers with compressor are distinguished for their extremely low power consumption. In places with sufficient heating (over 15°C), you can achieve energy and money savings by choosing among the wide range of models (Care, Eva II or Power) the ideal Inventor dehumidifier based on your needs.

## Clothes drying

Take advantage of the special Clothes drying mode and make your life easier. Place the clothes rack in a small room and close the door. The air produced by the dehumidifier reinforces freshness and ensures dry and fragrant clothes in a short period of time, while keeping the room completely dry. Clothes drying is a standard feature on Eva II Inventor model. However, you can effectively dry your clothes with all Inventor dehumidifiers by activating the Continuous dehumidification mode (Rise, Care, Power).

## Smart dehumidification (SMD)

The dehumidifier's power consumption is closely related to the room's temperature. When the temperature is low, the consumption increases while in places with higher temperature the consumption decreases. The function of smart dehumidification automatically selects the ideal moisture levels according to the room temperature, ensuring low power consumption and excellent conditions in your area. Save money and energy with the smart Eva II and Power Inventor dehumidifiers.

## Air Ionizer

Ensure a healthy and clean atmosphere in your home with the integrated Ionizer Inventor's dehumidifiers provide. Negative ions are released into the room absorbing dust, bacteria, tobacco and other unpleasant odors, offering a high quality air. Banish humidity and enjoy a clean environment due to the integrated ionizer of Inventor dehumidifier models Rise and Eva II.

## Turbo

Quickly reduce moisture, in rooms where it is dramatically increased. The upgraded Turbo mode enhances air extraction; it quickly and efficiently resets the ideal moisture levels in the room, creating a comfortable atmosphere.

Dehumidifying Capacity  
(L/24 hours)

\*Power Consumption 30W fan operation/ 330W ECO mode/ 650W TURBO mode

### Air ionizer

Ensure a clean and healthy room atmosphere, with the integrated Air ionizer. Enabling the Ionizer function releases negative ions into the air, which absorb dust, bacteria, cigarette and other unpleasant odors, offering a healthy and high quality atmosphere.

### Desiccant technology (Without compressor)

Benefit from the technology, without compressor, of the dehumidifier Rise. Banish humidity efficiently with low cost. Desiccant technology offers economical dehumidification in rooms heated only for a few hours per day or with an ambient temperature below 15 °C.

### Quiet operation

Enjoy quiet operation with Rise, the Desiccant dehumidifier. Desiccant technology - without compressor - gives you a low sound level of operation and an effective hygienic atmosphere without moisture.

### Enhance heating

Enhance heating and reduces costs significantly. Thanks to the hot air output, (10°C to 12°C warmer than the room temperature), along with the dehumidification, the room's temperature is enhanced economically and efficiently.

### ECO mode

Reduce power consumption and save money and energy. With the ECO mode, the device operates economically and the consumption is reduced to half (330Watt).

Dehumidifying Capacity (L/24 hours)	10	Power Consumption (W)	215	Noise Levels Low/Medium/High [dB(A)]	40/43
	12		207		40/44

Air Output (m³/h)	Water Tank (L)	Dimensions WxDxH (mm)	Net Weight (Kg)	Refrigerant	Room Temperature (°C)
120	2.0	308x247x456	11.0	R134a	5°C - 35°C
120	2.0	308x247x456	11.0	R134a	5°C - 35°C

### Overflow protection

Enjoy the safe operation of your dehumidifier thanks to the special equipment for protection from overflow. When the water tank is full the dehumidifier automatically switches off and the indication Full illuminates informing you that the water tank must be emptied, preventing any leakage.

### Continuous dehumidification

Benefit from the continuous dehumidification operation when immediate results are needed. With continuous dehumidification the device acts as a catalyst in conditions of high demand, such as drying clothes or flooded rooms, eliminating moisture quickly and effectively.

### Silent

Quietly enjoy a hygienic atmosphere without humidity. Enable Silent mode during the night or at times that require absolute silence and ensure the ideal level of moisture in your room, without hassles.

### Continuous drainage

Forget about contentiously emptying the water tank thanks to the continuous drainage option. Place the tube at the back of the device and plug it into the siphon. The water air collected during the operation of the dehumidifier will flow directly into any selected drain.

### Swivel casters

The dehumidifier can be easily moved wherever and whenever you want. The rotating wheels of the device allow you to place the dehumidifier wherever necessary for efficient results.

# EVA II

Dehumidifying Capacity (L/24 hours)	16	Power Consumption (W)	262	Noise Levels Low/Medium/High [dB(A)]	45/48
	20		322		45/48

Air Output (m³/h) (High/Low)	Water Tank (L)	Dimensions WxDxH (mm)	Net Weight (Kg)	Refrigerant	Room Temperature (°C)
170/150	3.0	350x245x510	14.0	R134a	5°C - 35°C
170/150	3.0	350x245x510	14.4	R134a	5°C - 35°C

### Air ionizer

Ensure a clean and healthy room atmosphere, with the integrated Air ionizer. Enabling the Ionizer function releases negative ions into the air, which absorb dust, bacteria, cigarette and other unpleasant odors, offering a healthy and high quality atmosphere.

### Clothes drying

Dry your clothes in an effective, healthy way with the Dryer operation. Place the clothes rack in a small room (with the door closed) and activate Clothes drying program. The air produced reinforces freshness and ensures dry and fragrant clothes in a short period of time, while keeping the room completely dry.

### Smart dehumidification

Save money and energy, thanks to the Smart dehumidification function. The dehumidifier automatically selects ideal moisture levels according to the room temperature, thus ensuring low power consumption and excellent conditions in your place.

### Turbo

Quickly reduce moisture, in rooms where it is dramatically increased. The upgraded Turbo mode enhances air extraction; it quickly and efficiently resets the ideal moisture levels in the room, creating a comfortable atmosphere.

### Swivel casters

The dehumidifier can be easily moved wherever and whenever you want. The rotating wheels of the device allow you to place the dehumidifier wherever necessary for efficient results.

### Smart dehumidification

Save money and energy, thanks to the Smart dehumidification function. The dehumidifier automatically selects ideal moisture levels according to the room temperature, thus ensuring low power consumption and excellent conditions in your place.

### Filter cleaning reminder

Protect the dehumidifier by keeping filters clean thanks to the filter-cleaning reminder function. Filter indication will notify you every time the filter is required to be cleaned, contributing to the efficient operation of the device and increasing the lifetime cycle of the dehumidifier.

### Turbo

Quickly reduce moisture, in rooms where it is dramatically increased. The upgraded Turbo mode enhances air extraction; it quickly and efficiently resets the ideal moisture levels in the room, creating a comfortable atmosphere.

### 24h Timer

Save money and energy, with the 24 hour timer of the dehumidifier, where you can easily program its function, in order to avoid unnecessary use, while you are away from home for a long time.

### Swivel casters

The dehumidifier can be moved easily wherever and whenever you want. The rotating wheels of the device allow you to place the dehumidifier wherever necessary for efficient results.
